

Applied Pediatrics, Inc. provides qualified professionals for **Special Education** and **ESE Departments** in school systems throughout the Southeast at rates that are reasonable and competitive. We provide the personal attention and resources our Special Education Teachers need to grow as professionals, individuals, and administrative assistance which allows them to focus on providing the best possible education.

We are compassionate, have a fun culture, and seek employees who want the same for students and their families.

Applied Pediatrics has a strong foundation in recruiting, placing, and supporting special educators. We are committed to helping children reach their full potential by providing exceptional services from qualified and compassionate educators. We strive to provide employees with an opportunity to fulfill professional aspirations, excellence, and value in servicing our students, and to continuously improve company processes to better serve our students.

We believe that constant and consistent communication with our schools and educators on a regular basis helps us understand their needs and the support they need to provide the best experience for clients' students. Every client is assigned an account manager, who acts as the liaison between all parties. We employ top-tier Quality Coordinators with extensive experience in the public school system. These professionals have a firm understanding of the demands as special educators. Our QCs are responsible for:

- Interviewing all potential candidates for school-based positions before they are submitted to the school client.
- Conducting an orientation for new educators before the school year starts, which provides general information about federal mandates and team building in the school setting.
- Providing support throughout the year by advising on techniques and other on-the-job concerns.
