

# EmpowerMe Loves New Therapists!

## Get the tools, training, and tech you need to kickstart your career!

There's nothing we like better than helping new therapists launch careers and change lives! That's why we have affiliations with numerous colleges and universities all across the country to inspire students to become experts at working with seniors.

The mentorship we provide gives you the chance to work side-by-side with experienced therapists, with clinical and operational support that's second to none.

And thanks to EmpowerMe's focus on person-centered care, you'll have more time working one-on-one with each patient than in most other settings. That leads to better outcomes — and unforgettable relationships!
